Failure to do so can result in a back injury or other injury. z To ensure proper ventilation for your ice maker. Choose a well-ventilated area with temperatures above 50ªÁÁF and below 100ªÁÁF. This unit MUST be installed in an area protected from the elements, e.g., wind, rain, water spray or drips. z The ice maker should not be located next to ovens, grills or other sources of high heat. z The ice maker must be installed with all electrical, water and drain connections in accordance with state and local codes. A standard electrical supply (115 V, 60 Hz.), properly grounded in accordance with the National Electrical Code and local codes and ordinances is required. z Do not kink or pinch the power supply cord between the ice maker and cabinet. z The fuse (or circuit breaker) size should be 3 amp. z It is important for the ice maker to be leveled in order to work properly. You may need to make several adjustments to level it. z All installations must be in accordance with local plumbing code requirements. z Make certain that the pipes are not pinched or kinked or damaged during installation. z Check for leaks after water line connection. z Never allow children to operate, play with or crawl inside the ice maker. z Although the unit has been tested at the factory, due to long-term transit and storage, the 6 6
